- Situational analysis
- Introduction of “Health Promoting Schools” manual
- Trainings
- 6 pilot schools- rapid assessment tool
- HBSC basic survey
- Action plan
- Implementation and evaluation

Implementation and evaluation of HPS

- January 2019 – WHO/SHE Mission to upscale health promoting schools at the National level
- Since March 2019 – technical consultations in regions of the country by schedule
 - 27 March- Nur-Sultan - 15 schools
 - 28-29 March- Akmola oblast - 42 schools
 - 8-12 April – Almaty and oblast- 67 schools
 - 15-19 April- Kostanay oblast – 50 schools

Implementation and evaluation of HPS

22-26 April– West-Kazakhstan oblast -58 schools

28-30 April – Atyrau oblast- 38 schools

13-16 May - Aktobe oblast -55 schools

Target audience of the technical consultations:

School administration, project coordinators, working groups.

School grades – primary and secondary education

Partners: WHO, NCPH, local healthcare and education authorities, municipalities

Implementation and evaluation

- **Implementation channels:**

- workshops with focus on 6 components of whole school approach, SHE manual
- examples of action plans and experience of pilot schools
- presentation of HBSC and COSI national data
- support in application of tools
- visits to schools by consultants

Local health authorities actively involve partners from sectors outside of healthcare

Implementation and evaluation of school health promotion

- In total from March to May - **325** schools were consulted
- In Almaty **151** schools signed memorandum and developed Action Plans
- Technical meetings will be conducted in **3** regions
- **680** schools will be included in consultations in 2019

Barriers

- Raising awareness and active participation of children and parents
- Engagement of the education sector
- Involvement of public, volunteers, local businesses to support healthy food availability around schools
- Monitoring, reporting and evaluation

Possibilities

- Skills development of local and regional coordinators
- Involvement of municipalities to support intersectoral collaboration
- Communication plans and strategy
- Competition
- Integration with the Healthy Cities Project
